

## Course Outline

**Course Name:** Check Point Certified Security Administrator R82

**Course Code:** CP-CCSA

DURATION	LEVEL	TECHNOLOGY	DELIVERY METHOD	TRAINING CREDITS
3 Days	Foundation	Check Point Quantum Security	VITL/In Class	IGS

### Course Overview

This course provides students with the fundamental knowledge, skills, and hands-on experience needed to configure, manage, and monitor an existing Quantum Security Environment. Students will learn how to access and navigate the Gaia Portal and the Gaia Command Line Interface, manage Administrator access, create and configure Network Objects, create new Security Policies, configure Ordered Layers and a Shared Inline Layer, elevate the traffic view and monitor system states, configure Identity Awareness, elevate security with HTTPS Inspection, configure Application Control and URL Filtering, and configure Autonomous Threat Prevention.

### Course Details

#### Category | Quantum

#### Target Audience

- Security Administrators
- Security Engineers
- Security Analysts
- Security Consultants
- Security Architects

## Duration

3 days

## Certification

Exam: 156-215.82

[vue.com/checkpoint](https://vue.com/checkpoint)

## NIST/NICE Work Role Categories

- Implementation & Operation
- Protection & Defense

## Prerequisites

### Base Knowledge

- Unix-like and/or Windows OS
- Internet Fundamentals
- Networking Fundamentals
- Networking Security
- System Administration
- TCP/IP Networking

## Check Point Courses

- Check Point Deployment Administrator (suggested)

## How to Enroll

<https://training-certifications.checkpoint.com>

## Agenda

### Module 1: Introduction to Quantum Security

- Identify the primary components of the Check Point Three-Tier Architecture and explain how they work together in the Check Point environment.

### Lab Tasks

- Explore Gaia on the security Management Server
  - Explore Gaia on the Dedicated Log Server
  - Explore Gaia on the Security Gateway Cluster Members
  - Connect to SmartConsole
-

- Navigate GATEWAYS & SERVER views
- Navigate SECURITY POLICIES views
- Navigate LOGS & EVENTS views
- Navigate MANAGE & SETTINGS views

## Module 2: Administrator Account Management

- Explain the purpose of SmartConsole administrator accounts
- Identify useful features for administrator collaboration, such as session management, concurrent administration, and concurrent policy installation

### Lab Tasks

- Create New Administrator and Assign Profiles
- Test Administrators Profile Assignments
- Manage Administrator Concurrent Assignments
- Take Over Another Session and Verify Session Status

## Module 3: Object Management

- Explain the purpose of SmartConsole Objects
- Give examples of SmartConsole Physical and Logical Objects

### Lab Task3

- Verify the Security Policy
- Modify Security Policies
- Install the Standard Security Policy
- Test the Security Policy

## Module 5: Policy Layers

- Demonstrate an understanding of the Check Point policy layer concept.
- Explain how policy layers affect traffic inspection.

### Lab Tasks

- Add an Ordered Layer
- Configure and Deploy the Ordered Layer Rules
- Test the Ordered Layer Policy
- Create an Inline DMZ Layer
- Test the Inline DMZ Layer

## Module 6: Security Operations Monitoring

- Explain the purpose of Security Operations Monitoring.
  - Tune the Log Server configuration.
  - Use predefined and custom queries to filter the logging results.
-

- Monitor the state of Check Point systems.

## Module 7: Identity Awareness

- Explain the purpose of the identity Awareness solution.
- Identify the essential elements of identity Awareness

### Lab Tasks

- Adjust the Security Policy for Identity Awareness
- Configure the identity Collector
- Define the User Access Role
- Test Identity Awareness

## Module 8: HTTPS Inspection

- Explain the purpose of the HTTPS Inspection solution.
- Identify the essential elements of HTTPS Inspection.

### Lab Tasks

- Enable HTTPS Inspection
- Adjust Access Control Rules
- Deploy the Security Gateway Certificate
- Test and Analyze Policy with HTTPS Inspection

## Module 9: Application Control and URL Filtering

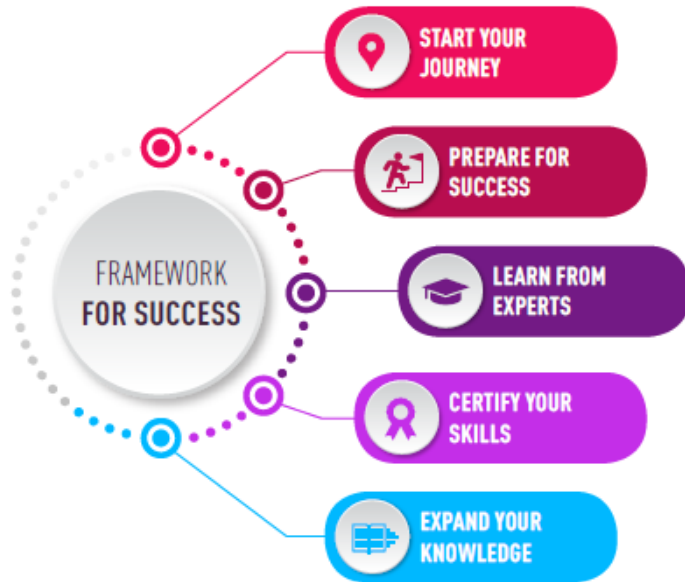

- Explain the purpose of The Application Control and URL Filtering Solutions.
- Identify the essential elements of Application Control and URL Filtering.

### Lab Tasks

- Adjust the Access Control Policy
- Create and Adjust Application Control and URL
- Test and Adjust the Application Control and URL Filtering Rules

## Module 10: Threat Prevention Fundamentals

- Explain the purpose of the Threat Prevention solution.
  - Identify the essential elements of Autonomous Threat Prevention
-

## FRAMEWORK FOR SUCCESS

The Check Point Framework for Success provides a path for continuous progress and lasting achievement as learners advance their knowledge and expertise in Check Point Security products.
